

## COVID-19 Advisory

**To:** Willow Valley Communities Residents  
**From:** Dennis W. Griest, President and CFO  
**Date:** June 6, 2020  
**Subject:** Positive COVID-19 Residents

---

Two Willow Valley Communities Residents have tested positive for COVID-19. The Residents, a couple, reside in their own residence in our Providence Park community. The source of the Residents' COVID-19 exposure is known, and is not affiliated with Willow Valley Communities. To mitigate COVID-19 transmission risk, the couple will be in isolation where they will be monitored by their personal physician and by Willow Valley Communities' Resident Nursing team.

Willow Valley Communities is following protocols for contact with appropriate government agencies. Upon learning of the Residents' positive test results, Willow Valley Communities immediately initiated its contact tracing protocols to identify any known person (Residents and/or Team Members) with whom the affected Residents may have had direct close contact in our communities within a specified period. That tracing process determined that no persons, Residents or Team Members, had direct close contact with the COVID-19 positive Residents.

Willow Valley Communities has been taking proactive measures to protect residents and team members since first knowledge of COVID-19. The community has been adhering to, and in many cases exceeding, the recommended control measures and guidelines of the PA DOH, CDC, and Centers for Medicare & Medicaid Services. Control measures are continuously updated as new information becomes available. Willow Valley Communities has been closed to visitors since March 13, 2020.
