

Special Edition: Universal Testing

COVID-19 Advisory

To: Willow Valley Communities Residents
From: Dennis W. Griest, President and CFO, Willow Valley Living
Date: October 16, 2020
Subject: 3 Positive Team Members via Universal Testing

Special Edition **Universal COVID-19 Testing**

Since the last Advisory Special Edition for universal testing was distributed on October 2, 2020, three (3) Team Members have tested positive for COVID-19 through universal testing. The Team Members' departments, work locations, and most recent days worked at Willow Valley Communities are listed below. All three COVID-19 positive Team Members were asymptomatic at the time of their COVID-19 tests.

- Team Member #1: Therapy for both campuses; most recent day worked: 10/8
- Team Member #2: Housekeeping at The Glen; most recent day worked: 10/9
- Team Member #3: Culinary Services at The Glen; most recent day worked: 10/9.

Willow Valley Communities is following protocols for contact with appropriate government agencies and is taking every step possible to limit further exposure. Willow Valley Communities implemented its contact tracing protocols to identify any known persons (Residents and/or Team Members) with whom the affected Team Members may have had exposure that requires additional risk mitigation. Willow Valley Communities has implemented additional precautionary measures and enhanced monitoring within the areas in which the COVID-19 positive Team Members worked.

Residents (and/or their POAs) residing in the supportive living community were notified and are being closely monitored and continually assessed for signs and symptoms of COVID-19. Team Members working within affected communities have been educated about specialized risk mitigation equipment and protocols, and will follow government health agency protocols for self-monitoring and daily screening.

We will continue to work with diligence and resolve to protect Willow Valley Communities' Residents and Team Members by implementing and adhering to, or exceeding, the most current recommended protocols and guidelines of the expert authorities in the medical and scientific communities.
