Willow Valley Communities implemented its contact tracing protocols to identify any known persons (Residents and/or Team Members) with whom the affected Residents or Team Members may have had exposure that requires additional risk mitigation. Willow Valley Communities has implemented additional precautionary measures and enhanced monitoring within the communities in which the COVID-19 positive Residents live and in which the Team Members have worked.

Team Members working within the affected areas have been educated about specialized risk mitigation equipment and protocols, and will follow government health agency protocols for self-monitoring and daily screening. We will continue to work with diligence and resolve to protect Willow Valley Communities' Residents and Team Members by implementing and adhering to, or exceeding, the most current recommended protocols and guidelines of the expert authorities in the medical and scientific communities.
